

Dear FCC Commissioners & Staff:

I use Iglou.com as my ISP & in the near future I hope to use their DSL service. I like very much being able to both telephone & e-mail them & get an immediate response, which has not been the case with several other internet providers I have used in the past. Please do not allow this vital service to be put in the hands of only a few large providers. I have never gotten satisfactory service with that type provider in many service situations. Please keep the option of using a smaller local or regional DSL provider as a part of the BEST solution.

Sincerely,

M. Ray Fryrear
